

Access Control

Utilizing the Power of Access Control

Toshiba has teamed up with multiple Access Control and other Integration partners to provide a truly robust security solution. By utilizing the benefits that video can bring to the Access Control arena, Toshiba is increasing the market for digital video.

Benefits

- » Integrated Access Control Software and Video
- » Search video using Access Control Software
- » Pull up video from a specified period of time
- » Better manage access to buildings
- » Better manage access to elevators
- » Utilize Surveillix Multi-site software for in-depth video
- » Many Partners offer graphical reports
- » Easily manage a secure infrastructure

MAXxess is in the business of security management and have been a leader in traditional access control for decades. Their systems are installed worldwide and range from small two-door systems to large campuses with multi-buildings or multi-sites managing hundreds of doors and thousands of badges. Their hardware and software provide business and government the highest-level of security management available today. MAXxess has gone beyond traditional security with the introduction of Environmental Security and SafeCities™.

Vicar Networks

5550 Triangle Parkway
Norcross, GA 30092

(770) 449-9771
(770) 449-9772 (FAX)

Vicar Networks solutions enable customers to interface with digital devices in their facility from any remote location with Internet access. They develop custom solutions, and offer integrated solutions to common-brand devices. Vicar's remote technologies are based on various platforms, including radio, cellular, paging, Ethernet, and Internet. Vicar Networks is in the business of providing access to the devices that improve processes or economic savings, whether or not a user is in the same location as the service desired. As the digital landscape expands to incorporate greater efficiency through automation, the need to interface with those devices has expanded as well. Vicar's solutions are based on a central command point for all controls.
