

SEAMLESS MIGRATION

RECORDS IP CAMERAS

REMOTE CONNECTIVITY

CONNECT TO UP TO

32 IP-BASED CAMERAS

The NVR offers the ability to view and record live video from anywhere in the world

NETWORK VIDEO RECORDING SOFTWARE

- Record up to 32 IP-based cameras per NVR Software install.
- Fully scalable in combination with the SCS remote software, giving users the ability to remotely manage 100+ network cameras.
- Cameras need not be on-site to record. The NVR Software can record over the internet.
- Cost effective solution to traditional DVRs.
- Records image resolutions as high as the IP camera supports, including megapixel cameras.
- Simultaneously configure, view, search, export, remotely upgrade, and monitor alarms with the SCS software. Supports multiple monitors for advanced monitoring.
- Complete remote management: setup control, user administration, video backup, live viewing, and powerful search capabilities.
- Support for major network video device manufacturers including Toshiba, Sony, Panasonic, AXIS, SecurGen, Lumenera, ACTi, Arecont Vision, and Vantage.*
- Fully integrates with, and provides a seamless migration path for, Toshiba KLR, PCDVR, DVR, EVR and HVR systems.

NVR Software

Network Video Recording Software

RECOMMENDED REQUIREMENTS	8/16 CH	32 CH
Processor	Intel® Core™2 Quad Q8200 2.33 Ghz	Intel® Core™2 Quad Q9550 2.83 Ghz
Memory	2 GB	3 GB
Storage Space	Storage based on video retention needs	
Video Card	PCI Express	
Video Output Device	SVGA monitor (1024 × 768)	
Network Connection	100/1000 Ethernet	
Operating System	Windows XP®	
Internet Browser	Internet Explorer 6+	
Removable Storage Media	CD-RW, DVD-RW	
Audio Output	Microsoft compatible sound card and speakers	

SPECIFICATIONS

Video Output	8/16 Network Cameras	32 Network Cameras
Recording Rate	Dependant on the camera encoding rate*	
PTZ Control	YES	
Recording Formats	MPEG, MJPEG, H.264	
Password Control	User Defined Access	

* Total recording throughput dependent on multiple factors including: system specs, camera codec, camera settings, camera resolution, and network bandwidth. Refer to the Toshiba P platform estimator for more information on the specifics of your installation.

Specifications subject to change without notice.

The Toshiba Surveillix NVR Software is a feature rich, powerful network Digital Video Recording Software.

Toshiba's NVR Software is the next great step in surveillance. The NVR Software has been designed for use on non-proprietary hardware and IT infrastructures, making it a cost effective next generation surveillance package*. The NVR Software allows users to connect up to 32 network cameras and/or network video servers per system. Options such as seamless integration with existing Toshiba DVRs, PTZ controls, and video based motion detection make this NVR Software a must for your surveillance needs.

*1 Year upgrade support included

MAIN FEATURES

- PAN / TILT / ZOOM controls on supported network cameras
- Simultaneous search, playback and backup
- Operates on computers running Windows XP
- Supports up to 32 network cameras
- Added support for megapixel network cameras
- Multiple levels of security access
- Advanced POS and ATM support
- Continuous, motion detection and alarm recording modes
- Records at the encoding resolution of the network camera
- Digital signature support for tamper-evident video and JPG exporting
- Fully integrates with Toshiba Digital Video Recorders
- Fully compatible with Toshiba network cameras
- Supports video encoders and other network devices

SUPPORTED NETWORK DEVICES

- Toshiba
- Lumenera
- Sony
- Arecont Vision
- AXIS
- SecurGen
- Panasonic
- Pixord
- Vivo Tek
- Samsung
- ACTi
- Vantage
