## Video Management System

### Multi-site Monitoring

The Surveillix SCS PC Video Management System is manufactured to provide optimized performance and usability. Built for network and hybrid video environments, the SCS PC is designed to support the highly-intensive requirements of megapixel, multi-compression installations. The SCS PC also improves user productivity and maximizes central management capabilities by providing support for multi-display environments. SCS software is a Multi-Site Video Management Software, a powerful utility that allows you to control over 100 units using one computer. This software allows you to view live video, search saved video, edit and configure setup on each recorder, and import maps of buildings and other locations.

- Microsoft Windows 7 operating system
- Dual or quad DVI/HDMI video display
- Gigabit network connection
- Two eSATA ports for easy backup to an external device
- SCS multi-site administration and viewing software installed

<b>DVI-I</b>	2560 x 1600 @ 60Hz	1920 x 1200
<b>DVI-D</b>	2560 x 1600 @ 60Hz	-
<b>HDMI</b>	1920 x 1200	1920 x 1200

\*4 video connections maximum; 2 on-board connections, and 2 video card connections.

## SCS Multi-Site Video Management

The SCS PC Multi-Site Management Software solution provides a complete control and administration solution for the entire line of Surveillix products. Designed for a multiple monitor environment, the SCS software platform enables you to simultaneously monitor alarms, retrieve video clips, and review live video from multiple locations. SCS also offers a rich selection of management tools, including remote administration, video backup, interactive mapping, and system configuration. SCS is designed to manage multiple Surveillix recorders from one location. Any application requiring video monitoring on one or more monitors, alarm monitoring (including visual map elements), and remote system management (health, settings, etc.) will benefit from the SCS Multi-Site Management Software.

## Highlights

- Virtual matrix capability
- Internet-based maps, such as Google Maps, integrate flawlessly into custom map lists
- Customize visual alarms in map manager
- Remotely monitor video, audio, and alarms
- Access and export recorded video
- Create infinite customized user accounts
- Remotely configure recorders
- View cameras from multiple Surveillix recorders on the same screen
- Create custom live camera views
- Connect to multiple sites simultaneously
- Recorder health check
- Optional point of sale search capabilities
- 2-way live audio
- Perform recorder updates remotely
- Control cameras with PTZ capabilities
