

# Surveillix® NVR

## Network Video Recording Server Software

## Cost-effective recording solution for IP cameras

Toshiba's Surveillix NVR Software has been designed for use in non-proprietary hardware and IT infrastructures, making it a cost-effective, next generation surveillance package. The Surveillix NVR Software allows users to connect up to 64 network cameras and/or network video servers per server. Options such as seamless integration with existing Toshiba SCS, PTZ controls, and video based motion detection make the NVR Software a must for your surveillance needs.

- Up to 64 IP camera per server
- Fully compatible with Toshiba SCS VMS for remote management
- Supports over 150 IP camera models including megapixel cameras
- User friendly, intuitive GUI
- IP camera licenses never expire
- Free Surveillix VMS software
